

VIGIL FRAUD INTELLIGENCE DOSSIER

Confidential Automated Investigation & Evidence Report

1. Executive Summary & Stream Metrics

This investigative dossier compiles real-time telemetry and forensic evidence processed through the Vigil detection engine. A total of 73 transactions across 54 unique accounts were evaluated against behavioral baselines, CatBoost classification models, and NetworkX graph topologies.

2. Analytical Layers & Threat Breakdown

- Layer 1 (Evidence Layer): Validated structural schemas and transaction attributes.
- Layer 2 (Defense-Evidence): Mapped automated mitigation rules to anomalous entities.
- Layer 3 (Campaign Graph): Detected active operational clusters and shared infrastructure.
- Layer 4 (Fraud Ring Radar): Flagged multi-hop coordination and synthetic identity rings.

3. High-Priority Case Evidence Log

- [TXN_60A2FB37] Account: ACC_NORM_40 | Amount: \$256.67 | Location: San Francisco | Status: Evaluated Secure
- [TXN_E0DD0C25] Account: ACC_NORM_37 | Amount: \$413.77 | Location: San Francisco | Status: Evaluated Secure
- [TXN_8F43BB7D] Account: ACC_NORM_13 | Amount: \$180.83 | Location: Berlin | Status: Evaluated Secure
- [TXN_603BE38F] Account: ACC_NORM_71 | Amount: \$341.02 | Location: New York | Status: Evaluated Secure
- [TXN_E826D883] Account: ACC_NORM_72 | Amount: \$30.99 | Location: Tokyo | Status: Evaluated Secure

4. Recommended Action

All active analytical streams are operating within acceptable threshold limits. Continue live monitoring via WebSocket ingestion.
